**SBL-600**  
Semi-Auto Gluer & Stitcher

# SBL-600 SEMI-AUTO GLUER & STITCHER

SBL Machinery (UK) Ltd would like to present the new SBL-600 Semi-Auto Gluer & Stitcher. One of the newest products from SBL, with a combination of gluing and stitching capabilities provides users with a choice of finishing options to enable best fit for end users products. Capable of applying 600 stitches/min the SBL-600 uses an advanced stitching process to make this box making machine the ideal choice, and combined with its strong construction, easy to maintain parts and leading components the SBL-600 will produce great products every time.

## Main Features

- › Max.stitching speed is 600 stitches/min and drive by serve motors
- › Special design feeding belt, easy to change
- › Movable stitching head for wide range of corrugated boxes
- › Motorized stitching head and feeding belts quick to change order
- › Stopper square box and smooth uninterrupted boxes flow for high quality and volume
- › Monitor control panel is user friendly
- › Counter ejector with spanker and blower for glue

### Ejector Table

The SBL-600 ensures smooth delivery of blanks with its high performance ejector table

### Counter ejector

Providing accurate counting of blanks for faster packing with the advanced counter ejector

### Blower

Fitted with blower to ensure speedy setting of glue, for improved adhesion quality

### Squaring Device

Highly innovative squaring device ensures smooth and uninterrupted box flow for quality high volume production

### Monitor control panel

Logical and simple to navigate control panel

### Glue head

User friendly gluing head is easy to load with no cleaning required

### Stitching head

Patented non-swing stitching head with simple and durable design

### Air Seal Glue Tank

The air seal glue tank presents loss of glue and pressure, ensuring maximum glue performance.

### Glue Heating Device

The heating system protects glue to ensure maximum performance in all climates

### Trans-Power System

Efficient, low noise trans-power system

### Pile Lift System

Hydraulic lifting system for automatic elevating of pile

### PLC

Programmable logic controller and electric cabinet
